## **DETAILED ACTION**

## Allowable Subject Matter

1. Claims 1-16 allowed.

## Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 17-19 and 21-23 rejected under 35 U.S.C. 103(a) as being unpatentable over Enders et al. (6,319,787) in view of Gambino et al. (6,194,755).

Regarding Claims 17-19, Fig. 5h of Enders et al. disclose a high surface area trench capacitor with electrodes 20 and 20' and insulating layers 27 and 25. Futhermore the electrode 20 sits in the center and electrodes 20' sit in the outer direction with insulating layers separating them. Enders et al. fail to disclose the required bottle-shaped trench structure, required diffused buried plate structure and the required encircling configuration. However, Gambimo et al. disclose a low-resistance salicide fill for trench capacitors where in Fig. 2. a bottle shaped trench capacitor structure with diffused buried plates 18 with the required encircling configuration

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required diffused buried plate and the required bottle-shaped trench structure and the required encircling configuration in Enders et al. as

Application/Control Number: 10/707,264

Art Unit: 2826

taught by Gambino et al. in order to have a deep trench capacitor structure with increased

area and performance.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Fazli Erdem whose telephone number is (571) 272-1914. The

examiner can normally be reached on M - F 8:00 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Nathan Flynn can be reached on (571) 272-1915. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
